CS230: Deep Learning
Course Staff

Andrew Ng
Instructor

Kian Katanforoosh
Instructor

Swati Dube
Coordinator

Amelie Byun
Coordinator

Shahab Mousavi
Head TA

Course Assistants

Jo Chuang
Advay Pal
Jonathan Lingjie Li
Sharon Zhou

Divyansh Garg
Avoy Datta
Tanay Kothari
I. Course logistics

II. Overview of CS230 programming assignments

III. Examples of student projects
Course Logistics

5 “courses”:

C1: Neural Networks and Deep Learning
C2: Improving Deep Neural Networks
C3: Strategy for Machine Learning Projects
C4: Convolutional Neural Networks
C5: Sequence Models

Example: C2M3: Course 2 Module 3

The schedule is on http://cs230.stanford.edu/syllabus/

We use Coursera: www.coursera.org

The class forum is on Piazza: piazza.com/stanford/fall2020/cs230
One week in the life of a CS230 student

1 module

Watch videos on Coursera  
≈1h

Solve quiz  
≈20min

Complete programming assignments  
≈1-2h

1 week of CS230 ≈ 2 modules + Zoom lecture (every Tuesday) ≈1h20 + TA sections (every Friday) ≈ 1 hour + 15min project mentorship w/ TA (every ≈2 weeks)

Assignments and Quizzes are due every Tuesday at 8.30am PDT
Grading Formula

\[ \text{Grade} = 0.02A + 0.08Q + 0.25Pa + 0.25M + 0.40Pr \]

A = Attendance  
Q = Quizzes  
Pa = (Programming) assignments  
M = Midterm  
Pr = Final-project

Active Piazza participation = 1% bonus
Example: For next Tuesday at 8.30am you have to complete the following assignments:

- 2 Quizzes:
  - Introduction to deep learning
  - Neural Network Basics

- 2 Programming assignments:
  - Python Basics with Numpy
  - Logistic Regression with a neural network mindset

At 7am on Tuesday: you submit 1 quiz and the 1 PA.
At 3pm on Tuesday: you submit the second quiz.
At 2pm on Wednesday: you submit the second PA.

How many late days did you use? 3 late days
I. Course logistics

II. Overview of CS230 programming assignments

III. Examples of student projects
Projects: SIGN language image classification
Projects: others

- Optimal goalkeeper shoot prediction
- Car detection
- Face recognition
- Art generation
- Music generation
- Text generation
- “I love you” Emojifier
- Machine translation
- Trigger word detection
- And many more…
Assignment: Car detection for autonomous driving
Projects: others

- Optimal goalkeeper shoot prediction
- Car detection
- Face recognition
- Art generation
- Music generation
- Text generation
- "I love you"
- Emojifier
- Machine translation
- Trigger word detection

And many more…
In the style of Claude Monet

In the style of Yayoi Kusama

In the style of Piet Mondrian

In the style of Pablo Picasso

[L. Gatys et al.: Image Style Transfer Using Convolutional Neural Networks, 2015]
Projects: others

- Optimal goalkeeper shoot prediction
- Car detection
- Face recognition
- Art generation
- Music generation
- Text generation
- "I love you"
- Emojifier
- Machine translation
- Trigger word detection
- And many more…
Today’s outline

I. Course logistics

II. Overview of CS230 programming assignments

III. Examples of student projects
Projects: others

LeafNet: A Deep Learning Solution to Tree Species Identification

Predicting price of an object from a picture

[Steven Chen: Fall 2017]
Detect cards from real-time video of tournaments to improve viewer understanding and accessibility

Figure 2: Predicted objects on a single frame from Dataset 1 produced by my model (left) and the YOLOv3 baseline (right).
**font-gen**: Deep Models for Inferring Alternate Language Sets from Fonts

*Figures 5-6*: Convolution; predicting Japanese sets.
The AI project development lifecycle

[The AI project development lifecycle, Workera (2020): www.workera.ai]
What technical roles make up an AI team

[The AI project development lifecycle, Workera (2020): www.workera.ai]
NBA 2k19 DeepBaller: A NN-Controlled Real-Time video game AI

Projects: others

Crop-type classification for small holder farms

Figure 5: Qualitative Performance in Germany (left) and South Sudan (right). Ground truth labels are in the top row while model predictions are in the bottom row. Each color corresponds to a different crop type.

Image-to-Image translation with Conditional-GAN

Figure 3: Generated map images of different architecture and hyperparameters. From left to right are source aerial images, baseline, U-Net, U-Net with ImageGAN, ResNet-6, ResNet-9, ResNet-50, and ground truth map images

### Discrete reasoning in natural language processing

<table>
<thead>
<tr>
<th>Reasoning</th>
<th>Passage (some parts shortened)</th>
<th>Question</th>
<th>Answer</th>
<th>BiDAF</th>
</tr>
</thead>
<tbody>
<tr>
<td>Subtraction</td>
<td>That year, his Untitled (1981), a painting of a haloed, black-headed man with a bright red skeletal body, depicted amid the artists signature scrawls, was <strong>sold by Robert Lehrman</strong> for $16.3 million, well above its $12 million high estimate.</td>
<td>How many more dollars was the Untitled (1981) painting sold for than the 12 million dollar estimation?</td>
<td>4300000</td>
<td>$16.3 million</td>
</tr>
<tr>
<td>Comparison</td>
<td>In 1517, the seventeen-year-old King sailed to Castile. There, his Flemish court .... In May 1518, Charles traveled to Barcelona in Aragon.</td>
<td>Where did Charles travel to first, Castile or Barcelona?</td>
<td>Castile</td>
<td>Aragon</td>
</tr>
<tr>
<td>Selection</td>
<td>In 1970, to commemorate the 100th anniversary of the founding of Baldwin City, <strong>Baker University professor and playwright Don Mueller and Phyllis E. Braun, Business Manager, produced a musical play entitled The Ballad Of Black Jack</strong> to tell the story of the events that led up to the battle.</td>
<td>Who was the University professor that helped produce The Ballad Of Black Jack, Ivan Boyd or Don Mueller?</td>
<td>Don Mueller</td>
<td>Baker</td>
</tr>
<tr>
<td>Addition</td>
<td>Before the UNPROFOR fully deployed, the HV clashed with an armed force of the RSK in the village of Nos Kalik, located in a pink zone near Šibenik, and captured the village at 4:45 p.m. on 2 March 1992. The JNA formed a battlegroup to counterattack the next day.</td>
<td>What date did the JNA form a battlegroup to counterattack after the village of Nos Kalik was captured?</td>
<td>3 March 1992</td>
<td>2 March 1992</td>
</tr>
<tr>
<td>Count and Sort</td>
<td>Denver would retake the lead with kicker Matt Prater nailing a 43-yard field goal, yet Carolina answered as kicker <strong>John Kasay</strong> ties the game with a 39-yard field goal .... Carolina closed out the half with Kasay nailing a 44-yard field goal. .... In the fourth quarter, Carolina sealed the win with Kasay’s 43-yard field goal.</td>
<td>Which kicker kicked the most field goals?</td>
<td>John Kasay</td>
<td>Matt Prater</td>
</tr>
</tbody>
</table>

**AI+X**: Leveraging your subject-matter expertise

- Roy, Quill, and Tuchman **from Material Science & Engineering** predicted the melting point and viscosity of ionic liquids based on the component anion and cation chemical structures ([report](#) [poster](#)).
- Buechler **from Mechanical Engineering** developed a deep learning framework to approximate the outputs from a power flow simulation, and evaluate performance for a variety of power network characteristics ([report](#) [poster](#)).
- Sokol and Aguirre **from the Biomedical Informatics Training Program** leveraged deep learning to estimate the ancestral composition of a genomic sequence at high resolution ([report](#) [poster](#)).
- Peng, Zhao, Yu **from Computer Science, Civil Engineering, and Biomedical Engineering** used deep learning to classify gestures from divers communicating with an autonomous robot companion in dangerous underwater environments ([report](#) [poster](#)).
- O’Day, Seagers, and Lee **from Bioengineering and Mechanical Engineering** studied neural signals of patients with Parkinson’s disease while walking to predict freezing behaviors ([report](#) [poster](#)).
Predicting atom energy based on atomic-structure
Visual Question Answering
Cancer/Parkinson/Alzheimer detection
Activity recognition in video
Music genre classification / Music Compression
Accent transfer in a speech
Generating images based on a given legend
Detecting earthquake precursor signals

Check out past projects: http://cs230.stanford.edu/past-projects/
To sum up

1. You will learn about wide range of deep learning topics
2. The course is very applied, you will code these applications
3. You have access to mentorship to build an outstanding project in 10 weeks

For next Tuesday (09/22) 8.30am:
- Create Coursera account and join the private session using the invitation
- Finish C1M1 & C1M2
- 2 Quizzes:
  ★ Introduction to deep learning
  ★ Neural Network Basics
- 2 Programming assignments:
  ★ Python Basics with Numpy
  ★ Logistic Regression with a neural network mindset
- Find project team-mates and fill-in the Google form that will be posted on Piazza.
- Fill out the CS 230 Section Preference Form to choose your section:
  https://forms.gle/LWcFKGCbc8CER9rs5 (This will be posted on Piazza too!)

This Friday (09/18):
- TA section “Getting Started with Your Project”

Download your iPython notebooks after you finished them!
You can find all deadlines on the website Syllabus
