CS230: Deep Learning
Course Staff

Andrew Ng  Instructor
Kian Katanforoosh  Instructor
Amelie Byun  Coordinator
Shahab Mousavi  Head TA

Course Assistants

Jo Chuang
Jonathan Lingjie Li
Avoy Datta
Sherry Ruan
Hao Sheng
Drew Hudson (Dor)
Fenglu Hong
Shubhang Desai
I. Course logistics

II. Overview of CS230 programming assignments

III. Examples of student projects
Course Logistics

5 “courses”:

C1: Neural Networks and Deep Learning
C2: Improving Deep Neural Networks
C3: Strategy for Machine Learning Projects
C4: Convolutional Neural Networks
C5: Sequence Models

Example: C2M3: Course 2 Module 3

The schedule is on http://cs230.stanford.edu/syllabus/

We use Coursera: www.coursera.org

The class forum is on Piazza: piazza.com/stanford/winter2021/cs230
One week in the life of a CS230 student

1 module

Watch videos on Coursera
≈1h

Solve quiz
≈20min

Complete programming assignments
≈1-2h

1 week of CS230 ≈ 2 modules

Zoom lecture (every Tuesday)
≈1h20

TA sections (every Friday)
≈ 1 hour

15min project mentorship w/ TA (every ≈2 weeks)

Assignments and Quizzes are due every Thursday at 8.30am PDT
Grading Formula

\[ \text{Grade} = 0.02A + 0.08Q + 0.25Pa + 0.25M + 0.40Pr \]

A  = Attendance  
Q  = Quizzes  
Pa = (Programming) assignments  
M  = Midterm  
Pr = Final-project

Active Piazza participation = 1% bonus
Example: For next Thursday at 8.30am you have to complete the following assignments:

- 2 Quizzes:
  ★ Introduction to deep learning
  ★ Neural Network Basics

- 2 Programming assignments:
  ★ Python Basics with Numpy
  ★ Logistic Regression with a neural network mindset

At 7am on Thursday: you submit 1 quiz and the 1 PA.
At 3pm on Thursday: you submit the second quiz.
At 2pm on Friday: you submit the second PA.

How many late days did you use?  3 late days
Students are expected to have the following background, and are invited to take the Workera technical assessments prior to the class to self-assess themselves prior to taking the class:

- **Knowledge of basic computer science principles and skills**, at a level sufficient to write a reasonably non-trivial computer program. This corresponds to a Developing level (or badge) in the “Algorithmic Coding” section on Workera.

- **Familiarity with the probability theory** (CS 109 or STATS 116), which students can assess by taking the “Data Science” section on Workera.

- **Familiarity with linear algebra** (MATH 51), which students can assess by taking the “Mathematics” section on Workera.

*(Recommended)* Take the Workera assessment (www.workera.ai) prior to starting the class, you’ll take it again at the end of the class to measure your progress!

<tbody>
<tr>
<td>Subtraction</td>
<td>That year, his Untitled (1981), a painting of a haloed, black-headed man with a bright red skeletal body, depicted amid the artists signature scrawls, was sold by Robert Lehrman for $16.3 million, well above its $12 million high estimate.</td>
<td>How many more dollars was the Untitled (1981) painting sold for than the 12 million dollar estimation?</td>
<td>4300000</td>
<td>$16.3 million</td>
</tr>
<tr>
<td>Comparison</td>
<td>In 1517, the seventeen-year-old King sailed to Castile. There, his Flemish court .... In May 1518, Charles traveled to Barcelona in Aragon.</td>
<td>Where did Charles travel to first, Castile or Barcelona?</td>
<td>Castile</td>
<td>Aragon</td>
</tr>
<tr>
<td>Selection</td>
<td>In 1970, to commemorate the 100th anniversary of the founding of Baldwin City, Baker University professor and playwright Don Mueller and Phyllis E. Braun, Business Manager, produced a musical play entitled The Ballad Of Black Jack to tell the story of the events that led up to the battle.</td>
<td>Who was the University professor that helped produce The Ballad Of Black Jack, Ivan Boyd or Don Mueller?</td>
<td>Don Mueller</td>
<td>Baker</td>
</tr>
<tr>
<td>Addition</td>
<td>Before the UNPROFOR fully deployed, the HV clashed with an armed force of the RSK in the village of Nos Kalik, located in a pink zone near Šibenik, and captured the village at 4:45 p.m. on 2 March 1992. The JNA formed a battlegroup to counterattack the next day.</td>
<td>What date did the JNA form a battlegroup to counterattack after the village of Nos Kalik was captured?</td>
<td>3 March 1992</td>
<td>2 March 1992</td>
</tr>
<tr>
<td>Count and Sort</td>
<td>Denver would retake the lead with kicker Matt Prater nailing a 43-yard field goal, yet Carolina answered as kicker John Kasay ties the game with a 39-yard field goal. .... Carolina closed out the half with Kasay nailing a 44-yard field goal. .... In the fourth quarter, Carolina sealed the win with Kasay’s 42-yard field goal.</td>
<td>Which kicker kicked the most field goals?</td>
<td>John Kasay</td>
<td>Matt Prater</td>
</tr>
</tbody>
</table>
• Roy, Quill, and Tuchman from Material Science & Engineering predicted the melting point and viscosity of ionic liquids based on the component anion and cation chemical structures (report poster).

• Buechler from Mechanical Engineering developed a deep learning framework to approximate the outputs from a power flow simulation, and evaluate performance for a variety of power network characteristics (report poster).

• Sokol and Aguirre from the Biomedical Informatics Training Program leveraged deep learning to estimate the ancestral composition of a genomic sequence at high resolution (report poster).

• Peng, Zhao, Yu from Computer Science, Civil Engineering, and Biomedical Engineering used deep learning to classify gestures from divers communicating with an autonomous robot companion in dangerous underwater environments (report poster).

• O’Day, Seagers, and Lee from Bioengineering and Mechanical Engineering studied neural signals of patients with Parkinson’s disease while walking to predict freezing behaviors (report poster).
And many more...

Predicting atom energy based on atomic-structure
Visual Question Answering
Cancer/Parkinson/Alzheimer detection
Activity recognition in video
Music genre classification / Music Compression
Accent transfer in a speech
Generating images based on a given legend
Detecting earthquake precursor signals

Check out past projects: http://cs230.stanford.edu/past-projects/
To sum up

1. You will learn about wide range of deep learning topics
2. The course is very applied, you will code these applications
3. You have access to mentorship to build an outstanding project in 10 weeks

For next Thursday (01/21) 8.30am:
- Create Coursera account and join the private session using the invitation
- Finish C1M1 & C1M2
- 2 Quizzes:
  ★ Introduction to deep learning
  ★ Neural Network Basics
- 2 Programming assignments:
  ★ Python Basics with Numpy
  ★ Logistic Regression with a neural network mindset
- Find project team-mates and fill-in the Google form that will be posted on Piazza.
- The AWS GPU credit registration form will be posted with instructions on Piazza before class. Upon forming a team, students should sign up for GPU credits no later than Wednesday, 1/20, at 11 PM PST.
- Students can use the “Search for Teammates!” option on Piazza to look for teammates as we are all remote and this can prove cumbersome as compared to normal times.

This Friday (01/15):
- TA section “Getting Started with Your Project”

Download your iPython notebooks after you finished them!
You can find all deadlines on the website Syllabus
